

ACWA Services Ltd is process solutions and technologies provider specialising in the design and construction of water, effluent and Bio-solids plants. Our objective is to achieve the best practicable environmental standards and practices throughout our business activities. To enhance ACWA's environmental performance we have established and maintain a documented and effective environmental management system for its operations certified to ISO14001:2015.

ACWA manages its activities to maximise environmental benefits, this will be through regular monitoring of our environmental performance, managing environmental risk and effectively implementing our environmental management system.

Our Environmental policy commits ACWA to:

- Identify significant environmental aspects relating to our activities and to maintain procedures and strategies for their management to meet the regulatory and legal requirements.
- Identify environmental risks, opportunities and interested parties relating to ACWA's activities.
- To minimise unnecessary use of materials, resources and energy by the implementation of environmentally responsible life cycle project delivery.
- Minimise waste generation and ensure responsible disposal of waste, including the utilisation of site waste management plans for all ACWA workspaces.
- Protect the environment, including prevention of pollution and the potential for pollution associated with ACWA's activities.
- Provide adequate resources and to ensure employee involvement in environmental matters, to provide communication, suitable training and support to implement the ACWA Environmental Management System.
- Ensure that any persons, including subcontractors working on our behalf, are communicated to and agree to comply with the requirements of this policy and ACWA's Environmental Management System.
- Control and influence suppliers of products and/or services to ensure that items and/or services can be used, handled, stored and disposed of in a manner that safeguards the environment.
- Strive to reduce the company's CO2 emissions.
- Undertake an annual review of this policy or upon the introduction of new processes, new procedures, new legislation or changes in key personnel
- Make this policy available to all interested parties as required.
- Integrate environmental principles into the business plan and day-to-day business decisions.
