

ACWA Services Ltd is a process solutions and technologies provider, specialising in the design and construction of water, effluent and bio-solids treatment plants. Our objective is to achieve the best practicable environmental standards and practices throughout our business activities. In order to enhance our environmental performance, we have established and maintain a documented and effective Environmental Management System for our operations, certified to ISO 14001:2015.

We will manage our activities to maximise environmental benefits. This will be through regular monitoring of our environmental performance, managing environmental risk and effectively implementing our Environmental Management System.

This Environmental policy commits ACWA to:

1. Identify significant environmental aspects relating to our activities and to maintain procedures and strategies for their management to meet the regulatory and legal requirements.
2. Identify environmental risks, opportunities and interested parties relating to ACWA's activities.
3. To minimise unnecessary use of materials, resources and energy by the implementation of environmentally responsible life cycle project delivery.
4. Minimise waste generation and ensure responsible disposal of waste, including the utilisation of site waste management plans for all ACWA workspaces.
5. Protect the environment, including prevention of pollution and the potential for pollution associated with ACWA's activities.
6. Provide adequate resources and to ensure employee involvement in environmental matters, to provide communication, suitable training and support to implement the ACWA Environmental Management System.
7. Ensure that any persons, including subcontractors working on our behalf, are communicated to and agree to comply with the requirements of this policy and ACWA's Environmental Management System.
8. Control and influence suppliers of products and/or services to ensure that items and/or services can be used, handled, stored and disposed of in a manner that safeguards the environment.
9. Strive to reduce the company's emissions, including CO2.
10. Undertake an annual review of this policy or upon the introduction of new processes, new procedures, new legislation or changes in key personnel
11. Make this policy available to all interested parties as required.
12. Integrate environmental principles into the business plan and day-to-day business decisions.
